Easy, Efficient Security for Windows® Server Hyper-V®

VIPRE Business Premium™ is the first endpoint security solution to offer fully integrated security management for Microsoft Windows® Server Hyper-V® virtual environments.

Protect your Hyper-V virtual clients by deploying VIPRE – via the hypervisor – to scan virtual machines for threats without the performance impact typically associated with running antivirus scans on each guest operating system.

VIPRE for Hyper-V excels in workload management, keeping your servers responsive and your users productive.

Easy to Deploy. Scales with Your Needs.

VIPRE for Hyper-V was engineered specifically for the Microsoft Hyper-V server virtualization platform, enabling you to:

» Leverage VIPRE's agentless deployment method using a centrally managed console to improve scan times up to 25%

» Maximize available resources by consolidating definitions and footprint to the host

» Balance usability and availability through workload management to ensure scans do not impact server performance or availability

» Discover and identify unprotected guest machines on your server

» Support Windows virtual guest operating systems even when the guest is turned off

Maximize Your Hyper-V Investment

Don't sacrifice the performance, availability and scalability gains you've achieved with Hyper-V because you chose the wrong antivirus solution for your virtual devices. Make the most of the time and resources you've invested in creating your Hyper-V environments by securing your guests with a leading endpoint security solution designed specifically for Hyper-V.

Try VIPRE for Hyper-V free for 30 days and experience how securing your virtual environments doesn't have to slow you down.

Not a VIPRE User? Not a Problem.

Deploy VIPRE for Hyper-V to secure your Hyper-V servers without any conflicts with the antivirus you use to protect your physical PCs and servers.

Endpoint Security You Can Trust

VIPRE earns high marks with security experts.

"A lot of additional protection over basic A/V, yet [VIPRE] deploys just as easily for around the same cost."

Proven Protection

VIPRE malware defense is certified by these leading testing authorities.
