Shared Policies	N/A	✓	✓

Whether you choose one of our Cloud-hosted products or our on premise self-hosted Server product, you will receive the very best in endpoint protection.

Our flagship Endpoint Detection & Response product is designed for organizations with larger, more mature security teams, whereas Endpoint Security Cloud is best suited for comprehensive protection with a minimum of fuss. Customers with specific requirements such as air-gapped networks may wish to consider our Endpoint Security Server product. If in doubt, consult with one of our qualified partners or contact VIPRE directly to find out the product that is right for you.
