

PD-60-12

Switching Power Supply
Input AC 100~240 V
DC Output 12 V / 5 A (60W)
Adjustable output 11~15 V
Protected against surges
and current peaks

AC/DC switchable power supply. Precise voltage stabilization. Grid casing for better heat dissipation.

Its input is connected directly to alternating current (AC 100~240 V) and provides continuous DC power 12 V / 5 A. It has an output. The voltage can be adjusted manually in a range between 11 V ~ 15 V.

It has protection systems against short circuit, overvoltage and current peaks to ensure a problemless performance of the installation.

Specifications

Input voltage AC 100~240 V

Input frequency 47~63 Hz

Output Voltage DC 12 V (typically)

Output voltage range Adjustable 11 V ~ 15 V

Output power 60W

Output current 5 A

Working temperature -20° C ~ +40° C

Dimensions 105 x 97 x 36 mm

Weight 250 g
